Claims 1, 2 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hengstenberger et al. '671 in view of Howlett et al. Hengstenberger shows arms loop 14 and a grip loop 16 formed of a single continuous length of material, the claimed difference being a separate loop for each arm. Howlett shows a pull harness having a pair of loops, one for each arm. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the arm loop 14 of Hengstenberger to form a pair of loops, as taught by Howlett, for encircling each arm.

Applicant's arguments with respect to claims 1,2 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the

advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
